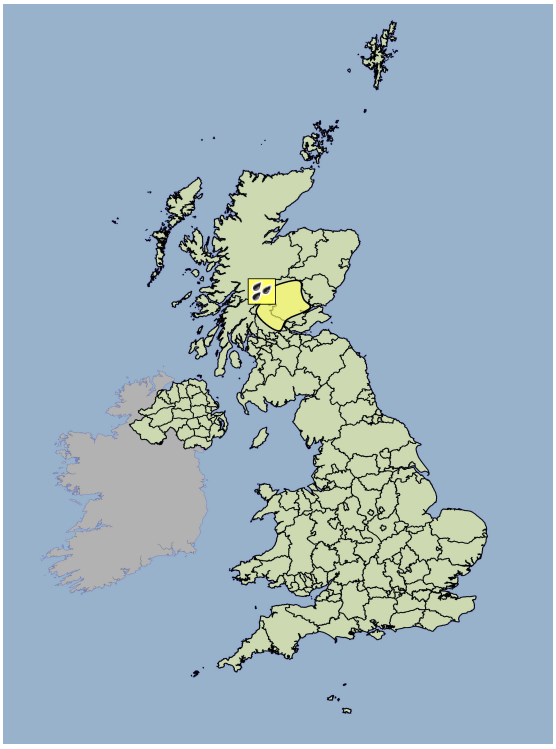
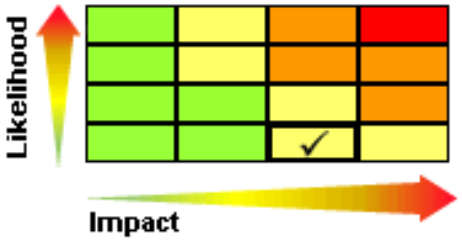
National Severe Weather Warning Service





Chief Forecasters Assessment
A deep area of low pressure with its associated fronts will cross the UK later on Saturday and at first on Sunday. This will produce some outbreaks of heavy rain with the heaviest rain being over Central Scotland where 40-60 mm could occur, giving the risk of some localised flooding.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **21:00 on Sat, 13th Apr 2013** until **14:00 on Sun, 14th Apr 2013**

An area of rain accompanied by strong southerly winds will move in across Scotland during Saturday evening and into Sunday. The heaviest of the rain is expected to be over Tayside and Central Scotland where rainfall totals will also be enhanced by some snow melt. The public should be aware that some localised flooding is possible. Surface water and spray will also affect the roads.

The rain should move away eastwards around the middle of Sunday.
